

# SUBJECT DATASHEET

**Circular Economy** 

**BMEGT42V106** 

BMEGT42V106

# **I. SUBJECT DESCRIPTION**

### **1. SUBJECT DATA**

#### Subject name

Circular Economy

ID (subject code)	BMEGT42V106
-------------------	-------------

#### Type of subject contact unit

#### Course types and lessons

Туре	Lessons
Lecture	2
Practice	0
Laboratory	0

#### Subject Coordinator

Name Position Contact details

Dr. Bartus Gábor senior lecturer bartus.gabor@gtk.bme.hu

#### Educational organisational unit for the subject

Department of Environmental Economics and Sustainability

#### Subject website

https://edu.gtk.bme.hu/

## Language of the subject

magyar - HU

#### Curricular role of the subject, recommended number of terms

Programme: Elective subjects Subject Role: Elective Recommended semester: 0

#### **Direct prerequisites**

StrongNoneWeakNoneParallelNoneExclusionNone

#### Validity of the Subject Description

Approved by the Faculty Board of Faculty of Economic and Social Sciences, Decree No: 581046/15/2021. Valid from: 24.11.2021.

Type of assessment mid-term grade Number of credits 2

## 2. OBJECTIVES AND LEARNING OUTCOMES

#### **Objectives**

The aim of the course is to acquaint students with the characteristics and environmental effects of socio-economic material use (material throughput) and land use change, the idea and measuers of the circular economy, as well as the environmental econo-mics of waste management and related environmental policies, especially in the European Union and in Hungary. During the course, we will also provide an overview of the possibilities of corporate management practices for circular economy.

#### Academic results

Knowledge

- 1. The student has theoretical knowledge of the parts of macroeconomics concerning the factors of production and knowledge of their practical applicability.
- 2. The student knows the different interpretive concepts and theories of circular economy.
- 3. The student knows the macro-level horizontal instruments of policies in the filed of material throughput and land use change.
- 4. The student knows the relevant indicators, typical methods of evaluation.
- 5. The student knows the main features of the practice of the corporate circular economy management.

#### Skills

- 1. The student is able to use the learned theories and methods, he/she explores, systematizes and analyzes facts and basic connecti-ons, formulates independent conclusions and critical remarks, makes decision-making proposals, and makes decisions in routine and partly unknown domestic and international environments.
- 2. The student interprets the possible consequences of the use of materials in his engineering or managerial profession and activity, and is able to create relevant circular economic alternatives for the management and solution of any problems that may arise.
- 3. The student is able to calculate and analyze the complex consequences of economic and technological processes.
- 4. The student can apply relevant problem solving techniques and methods, problem solving methods, taken into account their application conditions and limitations.
- 5. The student is able to collaborate with others with different disciplines.

#### Attitude

- 1. In order to perform quality work, the student is problem-sensitive and proactive.
- 2. Receptive to new information, new professional knowledge and methodologies, open to new, independent and collaborative tasks and responsibilities. The student strives to improve his knowledge and working relationships.
- 3. The student is open to challenges in the broader economic and social environment of the given job, work organization, enterprise, strives to follow and understand the changes.
- 4. The student has inclusive views on sectoral, regional, national and European values (including social, societal and ecological, sustainability aspects).

#### Independence and responsibility

- 1. The student is responsible for his/her analyzes, conclusions and decisions.
- 2. The student is responsible for complying with professional, legal, ethical standards and rules related to his/her work and conduct.

#### **Teaching methodology**

Lectures, written and oral communication, use of IT tools and techniques.

#### Materials supporting learning

- A kurzus alapvető tananyaga egy több cikkből és tanulmányból álló válogatás, amit az új eredmények megjelenésé-vel folyamatosan frissítünk. Az anyagok elektronikusan minden hallgató számára elérhetők, letölthetők.
- The core curriculum of the course is a selection of several articles and research papers, which are constantly updated as new results appear. The materials are available and downloadable for all students.

# **II. SUBJECT REQUIREMENTS**

### TESTING AND ASSESSMENT OF LEARNING PERFORMANCE

#### **General Rules**

#### Performance assessment methods

#### Percentage of performance assessments, conducted during the study period, within the rating

- -: 50%
- -: 50%
- -: 100%

#### Percentage of exam elements within the rating

• -: -

#### Conditions for obtaining a signature, validity of the signature

#### Issuing grades

00	
Excellent	92% felett
Very good	85-92%
Good	70-85%
Satisfactory	55-70%
Pass	40-55%
Fail	40% alatt
Retake and late completion	

Retake and late completion

#### Coursework required for the completion of the subject

- 14×2=28
- 13x1=13
- 19
- 60

#### Approval and validity of subject requirements

Consulted with the Faculty Student Representative Committee, approved by the Vice Dean for Education, valid from: 08.11.2021.
