2. OBJECTIVES AND LEARNING OUTCOMES

Objectives

The course discusses the theoretical foundations of financial and business ethics, describing the most important domestic and international practical experiences. Its result is twofold because it serves to develop moral sensitivity as well as to expand economic expertise. The main topics highlight the ethical dimension of the economy, such as the social and market mechanisms at the macro level, and the requirements of customers, employers, economic decision-makers and responsible corporate operations at the micro level. It aims to enable students to recognize and properly manage ethical economic decision-making dilemmas.

Academic results

Knowledge

1. the conceptual framework of financial and business ethics,
2. the most important ethical contexts and theories,
3. fair trading and dealing with customers
4. fundamentals of responsible corporate governance, fair competition

Skills

1. analyze financial and business processes and developments from an ethical point of view in practice
2. recognize and manage ethical decision-making dilemmas
3. plan and organize independent learning,
4. comprehend and use the professional literature of the topic,
5. grasp the professional language in writing and speech,
6. recognize and solve practical professional problems.

Attitude

1. open to the ethical context of economic processes,
2. collaborate with their instructors and fellow students during the learning process,
3. expand and gain knowledge and information,
4. are open to ethical and critical thinking.

Independence and responsibility

1. are open to accept reliable critical remarks,
2. are able to solve practical professional problems independently.

Teaching methodology

Lectures and written communication, use of ICT tools and techniques.
