2. OBJECTIVES AND LEARNING OUTCOMES

Objectives

In one half of the semester we will list the fundamental types, strategies and tools of negotiations, the pitfalls of certain negotiation situations and the proposed remedies, as well as the criteria for creating a win-win negotiation situation. In the second half of the semester, we will focus on creating effective and meaningful presentations and the techniques of presentation and rhetoric, including the development of the content and form of the presentation, the negotiation/business presentation and the verbal and nonverbal communication of the speaker. The theory is put into practice through case studies and small group assignments, simulating real negotiation situations, during which students can test and develop their negotiation skills "live", thus preparing for the challenges of the labor market. The tasks also gives students the opportunity to practice common presentation situations (TDK presentation, project presentation, thesis defense, business presentation, etc.) while the lecturers give immediate, on-the-spot feedback to help individual progress.
