Objectives

Building on the competences acquired during the previous semester, the subject aims at consolidating trainees' interpreting strat-egies (note-taking, anticipation, compression, inference, stress management, compensation strategies, etc.) as well as developing their topical vocabulary. The subject prepares trainees for their final interpreting examination where they are required to render a few-minute speech of intermediate difficulty into the target language with the use of notes. The subject also puts emphasis on the broadening of trainees' background knowledge, it will develop note-taking to the extent where trainees can record information on details (such as the speaker's personal opinion), the understanding of speeches delivered with various accents, and the prepara-tion for fictitious and real-life interpreting assignments.
