2. OBJECTIVES AND LEARNING OUTCOMES

Objectives

Students learn the basic concepts and problems of competition theory, market structures, forms of competition, barriers to entry and basic strategies in dealing with competitors. The lecture deals with the problems associated with the development of an appropriate institutional framework, such as competition law, its interpretation and enforcement, and the role of competition policy as an important element of economic policy. Particular attention is paid to the trade-offs that arise in the context of economic policy instruments aimed at "competitiveness". The aim is to provide the student with the most important elements necessary for an adequate analysis of competitiveness. This is partly achieved in the form of case studies relating both to the European Union and to the specific problems of digitalisation.
