2. OBJECTIVES AND LEARNING OUTCOMES

Objectives

The main objective of the course is to acquaint students with the main areas of macroeconomic finance (fiscal policy, monetary policy, fiscal stability, and their contexts). The review of the function of the state, the presentation of taxation, fiscal balance and public debt play an important role in teaching of fiscal policy. The central issues of monetary policy are the following: price and exchange rate stability, inflation, furthermore the instruments of central banks and money creation. The essence of financial stability is the ability of core financial markets and institutions to efficiently perform their functions: allocation of financial resources, risk management and managing payment transactions.
