Curricular role of the subject, recommended number of terms

Direct prerequisites

Strong nincs - none

Weak nincs - none

Parallel nincs - none

Exclusion None

Validity of the Subject Description

Approved by the Faculty Board of Faculty of Economic and Social Sciences, Decree No: 580269/9/2025 registration number. Valid from: 26.03.2025.

2. OBJECTIVES AND LEARNING OUTCOMES

Objectives

The main objective of the course is to provide insight into the background of the main factors influencing investment decisions. Beside the discussion of the classical trilemma of risk-yield-liquidity and the fundamentals of the efficient market hypothesis, the subject also covers the examination of the main indicators used to evaluate international financial markets (financial stress index, VIX index, TED spread etc.). Based on the risk-return characteristics of financial instruments, students participating in the course can also get acquainted with the pricing of bonds and shares, as well as the fundamental and technical analysis of shares. Within the frames of the course the government securities markets and stock exchanges are given special emphasis, among actors of these markets institutional investors and investment banks have outstanding importance. After an introduction to the most important types of derivative products (options, futures and swaps), the course allows an outlook to the future perspectives of financial markets marked by financial innovations (securitisation, credit derivatives, ETFs, REITs).

Academic results

Knowledge

1. The audience will be familiar with
2. portfolio management;
3. alternative investment opportunities;
4. personal finance.

Skills

1. The audience will be able to
2. understand the return-risk characteristics of different alternative investments;
3. apply the course theory to measure the risks attached to different investment portfolios;
4. calculate the alphas of hedge fund strategies;
5. formulate investment strategies;
6. manage and monitor investment portfolios.

Attitude

1. The audience
2. is open to getting to know and adapting portfolio theory;
3. collaborates with their instructors and others during the learning process;
4. gains knowledge and information;
5. uses the possibilities offered by IT tools.

Independence and responsibility

1. Students
2. are open to accept critical remarks;
3. co-operate with other students – as part of a team – in solving exercises;
4. apply systematic thinking in relation to financial market instruments.

Teaching methodology

Lectures, written and oral communication, use of IT tools and techniques, optional tasks alone and in groups.

Materials supporting learning

by 50%; the total score is a weighted average of mid-term exam 1 (50%) and mid-term exam 2 (50%)

Performance assessment methods

The total score is 100 points

Percentage of performance assessments, conducted during the study period, within the rating

Percentage of exam elements within the rating

Conditions for obtaining a signature, validity of the signature

Issuing grades

Excellent	90
Very good	80–90% (80-90 pont/points)
Good	70–80% (70-80 pont/points)
Satisfactory	60–70% (60-70 pont/points)
Pass	50–60% (50-60 pont/points)
Fail	below 50% (50 pont/points)

Retake and late completion

There will be one retake exam possibility

Coursework required for the completion of the subject

participation on contact lessons	24
preparing for the exam	66

Approval and validity of subject requirements

Consulted with the Faculty Student Representative Committee, approved by the Vice Dean for Education, valid from: 03.03.2025.
