2. OBJECTIVES AND LEARNING OUTCOMES

Objectives

The European Union is one of the world's largest economies and one of most important actors of global trade. The course gives a comprehensive overview of the European Union's economic law and policy, focusing on issues of economic integration, internal market, economic crimes, corporate compliance activities and the regulation of new digital technologies. The course's topics are divided into three sections: - brief introduction into the law and operation of the European Union – historical and economic background, as well as institutional framework, legal order, sources of law; - economic law and policy in domestic matters – the rules and operation of the internal market, based on the free movement of persons, goods, services and capital; - economic crimes in a wider sense, corporate compliance activities, new digital technologies and the law.

Learning outcomes

Knowledge

1. The course selects those issues of EU economic law and policy that have a high potential of being of interest for a non-lawyer audience.

Ability

1. At the end of the course, students will be able to identify and analyze legal and policy problems in this field.

Attitude

1. The course gives a comprehensive overview of EU economic law and policy as to free trade and free competition.

Autonomy and responsibility

1. At the end of the course, students will be able to identify and analyze legal and policy problems in this field.

Methodology of teaching

The course is specifically designed to the needs of a non-lawyer audience: it presents the materials accordingly and focuses on issues that have a high potential of being of general interest and the special requirements of the studies.

Materials supporting learning

- Klaus-Dieter Borchardt, The ABC of EU law (2017), pp. 11-145.

II. SUBJECT REQUIREMENTS
