BMEEOFTAMM1 2025.10.31 16:12 1/5

# I. SUBJECT DESCRIPTION

### 1. SUBJECT DATA

Subject name

**GEOINFORMATICS** 

ID (subject code) BMEEOFTAMM1

Type of subject

Contact lessons

Course types and lessons		Type of
Type	Lessons	<u>assessment</u>
Lecture	2	final exam
Practice	0	Number of
Laboratory	0	<u>credits</u> 3

**Subject Coordinator** 

Name Position Contact details

Dr. Szabó György associate professor szabo.gyorgy@emk.bme.hu

### Educational organisational unit for the subject

External department

### Subject website

https://edu.gtk.bme.hu

### Language of the subject

magyar - HU

### Curricular role of the subject, recommended number of terms

Programme: Engineering Management Bachelor's Programme from 2015/16/Term 1

Subject Role: Compulsory Recommended semester: 1

Programme: Engineering Management Bachelor's Programme from 2017/18/Term 1

Subject Role: Compulsory Recommended semester: 1

Programme: Engineering Management Bachelor's Programme 2010

Subject Role: Compulsory Recommended semester: 1

### **Direct prerequisites**

Strong None
Weak None
Parallel None
Exclusion None

### Validity of the Subject Description

Approved by the Faculty Board of the Faculty of Economic and Social Sciences, Valid from September 1, 2019

BMEEOFTAMM1 2025.10.31 16:12 2/5

### 2. OBJECTIVES AND LEARNING OUTCOMES

### **Objectives**

The objectives for this course include both content and skills of geoinformatics to modeling and analysis of the natural and built phenomena of the environment. Upon completion of this course, students will understand the structure of and be able to design and execute basic GIS analysis projects. In practice, students will be able to collect and assess location based geographic data, organize and store that data, perform basic analysis functions on that data and design effective models to represent built-up and natural environmental phenomena. The course will cover the whole GIS production process from data acquisition to editing, analysis, and visualiza-tion. The lectures introduce the theory of geoinformatics, and the case studies, which help the students to famil-iarize themselves with many aspects of the standardizes GIS software environment and industrial applications.

### Academic results

### Knowledge

- 1. knows the elements of geoinformatics theory,
- 2. the key principles of location based environmental analysis,
- 3. knows the procedures on location based intelligence and the ways of their description,
- 4. knows the basic steps of digital representation of built-up and natural environment,
- 5. knows the basic spatial data capturing, spatial analysis and visualization technic,

### Skills

1. definie spatial indicators to analyze the complex interaction between the nature, in-frastructure, socity and culture,

### Attitude

1. open to use geospatial tools,

### Independence and responsibility

- 1. individually capable of modelling space related phenomena and realizing the dependencies,
- 2. uses systematized thinking approach.

#### **Teaching methodology**

Lectures and written communication, use of ICT tools and techniques. In-class discussions, calculations and analyses.

### **Materials supporting learning**

- Az előadások prezentációinak anyaga, amely a megfelelő időpontban a hallgatók által hozzáférhetővé válik.
- Slideshows of the lectures which will distributed at appropriate times throughout the semester.
- Az aktuális irodalmi lista az első órán kerül ismertetésre.
- The current literature list will be distributed in the first lesson.

# II. SUBJECT REQUIREMENTS

### TESTING AND ASSESSMENT OF LEARNING PERFORMANCE

### **General Rules**

Assessment of the learning outcomes described under 2.2. shall be based on mid-term grading.

### Performance assessment methods

Detailed description of assessments during the term: Students shall submit three lab assignments and one complex project reflecting their knowledge and skills.

### Percentage of performance assessments, conducted during the study period, within the rating

Control test: 30%Final exam: 70%total: 100%

### Percentage of exam elements within the rating

### Conditions for obtaining a signature, validity of the signature

### **Issuing grades**

Excellent	90-100
Very good	80-89
Good	70-79
Satisfactory	60-69
Pass	50-59
Fail	< 50

### **Retake and late completion**

Retakes and make-ups are regulated by the university's Code on Education and Examination. (1) Of the three lab assessments, cannot be retake. (2) These may be made up for or improved on one count, during the make up period. In case of re-submission or late submission,

the new score will overwrite any previous scores obtained. (3) Should the student fail to obtain a passing grade as specified in (2), they may once again re-submit one written assignment, which will be evaluated for a fee.

### Coursework required for the completion of the subject

28

44

18

90

### Approval and validity of subject requirements

Consulted with the Faculty Student Representative Committee, approved by dr. Lógó Emma, Vice Dean for Education, Valid from September

1, 2019.

BMEEOFTAMM1 2025.10.31 16:12 4/5

## III. COURSE CURRICULUM

### THEMATIC UNITS AND FURTHER DETAILS

### Topics covered during the term

Subject includes the topics detailed in the course syllabus to ensure learning outcomes listed under 2.2. can be achieved. Timing of the topics may be affected by calendar or other circumstances in each semester.

- 1 Introduction, Global Overview of GIS Techniques
- 2 Geographic Data Modeling
- 3 GIS applications, case studies
- 4 Practical introduction to the used GIS software
- 5 Managing GIS
- 6 GIS data collection technologies, spatial data creation
- 7 Earth observation, Global-, Regional-, National Spatial Data Infrastructure
- 8 The GeoWEB, World, EU, HU data sources
- 9 Visualization, Cartography and map production
- 10 Spatial analysis: Society, Economy, Infrastructure, Environment
- 11 Spatial analysis: 3D terrain modeling
- 12 Spatial analysis: Land use, Land cover monitoring
- 13 Complex spatial analysis, decision support
- 14 Smart cities, smart applications

### **Additional lecturers**

Mostafizur Rahman PhD hallgató - PhD Student

### Approval and validity of subject requirements

Part I-III of the Subject Form is to be approved by the Head of Department named under 1.8.

BMEEOFTAMM1 2025.10.31 16:12 5/5
