2. OBJECTIVES AND LEARNING OUTCOMES

Objectives

One of the aims of the course is to increase students' sensitivity to the ethical aspects of psychological activity and to provide aspects and techniques for dealing with ethical dilemmas. Another goal of the course is to provide clues to professional orientation and help students with career planning. During the course, we list the professional ethical norms, issues and possible ethical dilemmas related to psychological activities, more precisely research, scientific communication, clinical trials, and work and organizational psychological activities, and their possible solutions. In addition to professional ethics issues, we deal with professional tasks that can be performed with a degree in psychology, the competencies required for this profession, various psychological career paths, and further training and development opportunities in order to prepare for a career and support career socialization.

Academic results

Knowledge

1. The student knows the ethical norms, issues and solution possibilities of research and publication activities, clinical research, bioethics, and work and organizational psychological activities.

Skills

1. The student is able to identify ethical dilemmas that arise in the work of psychologists and to systematically consider the possibilities of their solutions.
2. Is able to set professional goals for himself / herself, to identify the steps necessary to achieve them, to prepare a professional development plan.

Attitude

1. Open to expanding knowledge related to ethical knowledge related to the work of psychologists.
2. Open and motivated to apply the acquired knowledge.
3. Collaborates with the instructor and fellow students to expand knowledge.

Independence and responsibility

1. Expect and utilize new knowledge.
2. Actively participates in the process of acquiring knowledge.
3. Solves individual and group tasks responsibly and independently.
4. Collaborates with fellow students during group work.

Teaching methodology

Lectures, discussion of case studies, interview with a psychologist on career planning and professional ethics, presentation and joint discussion of interview lessons.

II. SUBJECT REQUIREMENTS

TESTING AND ASSESSMENT OF LEARNING PERFORMANCE

General Rules

The learning outcomes set out in section 2.2 are assessed on the basis of mid-year performance measurement.

Performance assessment methods

Detailed description of performance evaluations performed during the diligent period: Students do a group in-interview with a psychologist.

The interview covers career socialization, career planning aspects, and ethical di-lemmas that arise during psychological work. The lessons of the interview are summarized in a presentation that is presented to their fellow students and discussed together.

Percentage of performance assessments, conducted during the study period, within the rating

- Interview and presentation: 100%

Percentage of exam elements within the rating

Conditions for obtaining a signature, validity of the signature

The condition for obtaining the signature is that the student attends the classes and completes each of the project tasks according to point 3.3.

Issuing grades

Excellent	> 90
Very good	80–89
Good	70–79
Satisfactory	60–69
Pass	50–59
Fail	< 50

Retake and late completion

1) We use the regulations in accordance with the TVSZ. 2) The written exam can be improved during the exam period.

Coursework required for the completion of the subject

28

32

60
