

SUBJECT DATASHEET

Environmental Management in Energetics

BMEGT42A411

BMEGT42A411 2025.10.18 12:20 1/5

I. SUBJECT DESCRIPTION

1. SUBJECT DATA

Subject name

Environmental Management in Energetics

ID (subject code) BMEGT42A411

Type of subject

contact unit

Course types and lessons		Type of
Type	Lessons	<u>assessment</u>
Lecture	2	mid-term grade
Practice	1	Number of

Laboratory 0 credits

Subject Coordinator

Name Position Contact details

Dr. Csuvár Ádám senior lecturer csuvar.adam@gtk.bme.hu

Educational organisational unit for the subject

Department of Environmental Economics and Sustainability

Subject website

https://edu.gtk.bme.hu/

Language of the subject

magyar - HU

Curricular role of the subject, recommended number of terms

Programme: **BSc in Mechanical Engineering**Subject Role: **Compulsory for the specialisation**

Recommended semester: 7

Direct prerequisites

Strong None
Weak None
Parallel None
Exclusion None

Validity of the Subject Description

Approved by the Faculty Board of Faculty of Economic and Social Sciences, Decree No: 580251/13/2023 registration number. Valid from: 29.03.2023.

BMEGT42A411 2025.10.18 12:20 2/5

2. OBJECTIVES AND LEARNING OUTCOMES

Objectives

The aim of the course is to provide general knowledge to the students about the policy and indicator-based background of sustainable energy management

Academic results

Knowledge

- 1. Knows the main concepts of sustainable energy management.
- 2. Knows the main interlinkages between energetics and dimension's of sustainability
- 3. Knows the process of energy markets and their impacts on environment and society
- 4. Knows the main principles of national and EU energy policies

Skills

1. Able to form own opinion in energy management issues

Attitude

- 1. Cooperate by the lecturer and other students
- 2. Endeavors to understand the complex sytems
- 3. Endeavors to make its decisions taking into account technical, economic and social aspects

Independence and responsibility

- 1. Independently selects and applies the relevant problem-solving and analytical methods in solving the analyt-ical tasks belonging to his / her field
- 2. Feels responsible for achieving sustainable development
- 3. Feels responsible for taking greater account of environmental and social aspects

Teaching methodology

Lectures. Oral and written communication, use of IT, optional individual and group assignments and planning.

Materials supporting learning

- Előadás-anyagok / Lecture slides
- 1. Peter Zweifel; Aaron Praktiknjo; Georg Erdmann: Energy Economics. Berlin University of Technology. Springer, Germany, 2017.

II. SUBJECT REQUIREMENTS

TESTING AND ASSESSMENT OF LEARNING PERFORMANCE

General Rules

The assessment of learning outcomes set out in point 2.2. are: 1. summative evaluation of the competencies acquired during the semester

(2 mid-term exams).

Performance assessment methods

Detailed description of performance evaluations performed during the semester: Summative evaluation of learning outcomes (summative

assessment): a complex, written way of evaluating the knowledge and ability type competence elements of the subject in the form of a test. The test focuses on the assessment of the acquired knowledge and its application. The part of the curriculum on which the assessment

is based is determined by the lecturer of the subject, the available working time is 45 minutes.

Percentage of performance assessments, conducted during the study period, within the rating

1st summative assessment: 502nd summative assessment: 50

• total: 100

Percentage of exam elements within the rating

Conditions for obtaining a signature, validity of the signature

-

Issuing grades

Excellent	92
Very good	85-91
Good	70–84
Satisfactory	55–69
Pass	40–54
Fail	0-39

Retake and late completion

The two summative assessments can be retaken. For the first time in the last week of the semester, the summative assessments can be retaken or corrected free of charge. In case of correction, the new result overwrites the old one. If the student is not able to obtain a grade different from the 'Fail' with the replacement according to the first point, he / she can make a second attempt at the successful performance for the second time, in addition to paying the fee specified in the regulations.

Coursework required for the completion of the subject

Participation in contact classes	28
Preparing for contact lessons	26
Preparing for summative assessments	36
total	90

Approval and validity of subject requirements

BMEGT42A411 2025.10.18 12:20 4/5

III. COURSE CURRICULUM

THEMATIC UNITS AND FURTHER DETAILS

Topics covered during the term

Subject includes the topics detailed in the course syllabus to ensure learning outcomes listed under 2.2. to be achieved. The schedule of topics in the course curriculum in each semester may be affected by the calendar and other constraints.

- 1 Introduction, the world's energy situation, global trends
- 2 Hungary's energy situation, trends
- 3 Energy, energy management indicators
- 4 Possibilities of using renewable energy sources I.
- 5 Possibilities of using renewable energy carriers II.
- 6 Energy efficiency, energy saving, building energy
- 7 Integrated energy and climate policy
- 8 The energy business model (energy markets) I.
- 9 The business model of energy (energy markets) II.
- 10 Energy life cycle analysis
- 11 Sustainability-based analysis of the environmental effects of different energy carriers
- 12 Sustainable energy management at local and regional level (SECAP)

Additional lecturers

Kármán-Tamus Éva PhD hallgató / PhD student tamus.eva@gtk.bme.hu

Dr. Pálvölgyi Tamás egyetemi docens / associate professor palvolgyi.tamas@gtk.bme.hu
