## 2. OBJECTIVES AND LEARNING OUTCOMES

#### **Objectives**

The aim of the course is to give participants a better understanding of the characteristics of human behavior, the behavior of managers and subordinates, the specifics of groups in the work environment, and the design rules of the organization as a whole. In discussing the topics, we refer to the applicable management methods based on them and their effects on the members of the organization and their performance. In discussing each topic, we present the problems that typically occur in organizations through practical examples. Our further goal is for managers working in organizations to be able to combine the results of economics, sociology, psychology, and to apply the most suitable for the organization in managerial roles.

#### **Academic results**

## Knowledge

- 1. Know all the important elements of the concept of management and organizational science, understand the connections that form the basis of managerial work.
- 2. Have an overview of the interactions between the organizations, their managers and employees, the operational practices of the organizations.
- 3. Have a confident methodological knowledge in different areas of management, understand the application possibilities and combination possibilities of the learned methodologies.
