Approved by the Faculty Board of Faculty of Economic and Social Sciences, Decree No: 581046/15/2021. Valid from: 24.11.2021.

2. OBJECTIVES AND LEARNING OUTCOMES

Objectives

The aim of this course is to present the basic questions of the digitalizations and the network economics, challenges, opportunities. The students will get acquainted how the classical business processes can be transformed because of the ICT. At first we summarize the macroeconomic effects of the ICT-s, especially focusing on the productivity, economic growth and employment. In connection with this we will see the microeconomical characteristics of the digital or informational products, especially those business models that are important to companies. We will discuss in detail the pay-off of the ICT investments, the economical issues of the widespread platforms (app-s), and many aspects of the data economics. After dealing with the horizontal fields, we will discuss some vertical economic areas, like e-commerce, financial services, industrial development (Industry 4.0), and some typical effects on the public sector. Later we discuss some forward-looking areas of virtual new industrial opportunities, like e-sport or services regarding augmented reality. Beside the thorough discussion of micro- and macroeconomic concepts, we emphasize that the subject is managerial approached and no pre-requisites are needed.

Academic results

Knowledge

1. Know the economical and especially the financial models of the digital and network economics.
2. Know the basics of the business model creation, especially in modern digital ecosystem.

Lectures, individual tasks, groupwork

Materials supporting learning

- Nemeslaki A. (2020): Digitális transzformáció projekt, oktatási segédanyag, BME GTK, Budapest Tárgyfelelős által készített jegyzet és letölthető formában a tanuláshoz felhasználható az előadásokon bemutatott diasorozat és cikkek. A tárgyhoz kapcsolódó jegyzet és a bemutatott diasorozat a tantárgy Moodle oldaláról letölthető.

II. SUBJECT REQUIREMENTS

TESTING AND ASSESSMENT OF LEARNING PERFORMANCE

General Rules

A 2.2. pontban megfogalmazott tanulási eredmények értékelése beadandó projektfeladat értékelése alap ján történik.

Performance assessment methods

Projektfeladat csoportos és egyéni elemekkel 50-50%-ban. Ezek pontos követelménye létszám-függő. Az adott félévi követelményeket, a dolgozatok beadási határidejét az oktató az első kontaktorán kihirdeti és a félév elején a tantárgy honlapján közzéteszi. Teljes egészében szorgalmi időszak alapján történő teljesítés.

Percentage of performance assessments, conducted during the study period, within the rating

Percentage of exam elements within the rating

Conditions for obtaining a signature, validity of the signature

A tárgy teljesítése nem kötött aláíráshoz.

Issuing grades

Excellent	91-100
Very good	85-90
Good	70-84
Satisfactory	55-69
Pass	40-54
Fail	0-39

Retake and late completion

A TVSZ megfelelő paragrafusa szerint.

Coursework required for the completion of the subject

részvétel a kontakt tanórákon	6×2=12
félévközi készülés az órákra	12
projekt feladat elkészítése	42
kijelölt írásos tananyag önálló elsajátítása	24
összesen	90

Approval and validity of subject requirements

0

III. COURSE CURRICULUM

THEMATIC UNITS AND FURTHER DETAILS

Topics covered during the term

A 2.2. pontban megfogalmazott tanulási eredmények eléréséhez a tantárgy a következő tematikai blokkokból áll.

- 1 Bevezetés a digitális gazdaság és információgazdaság fogalomkörébe és jelentőségébe
- 2 A digitális termékek gazdaságtana
- 3 Platform gazdaságtan – kétoldalú piacok elmélete
- 4 Vállalati internet stratégia – e-business és digitális transzformáció
- 5 Az iparfejlesztés digitális gazdaságtana
- 6 Digitális iparágak működése
