The assessment of the learning outcomes set out in 2.2 is based on a written examination during the examination period, and a case study (partial performance assessment) and classroom activity during the semester.

Performance assessment methods

A. Exam: a test of the theoretical background and practical application of the topics covered during the semester. B. Classroom activity. c. Performance assessment: written assignment (case study) to be submitted and presented to assess the practical application of the theory.

Percentage of performance assessments, conducted during the study period, within the rating

- partial performance measurement (case study): 50
- classroom activity: 50
- total: 100

Percentage of exam elements within the rating

- written exam: 80
- partial performance measurement (case study): 10
- classroom activity: 10
- total: 100

Conditions for obtaining a signature, validity of the signature

Eligibility for the exam and signature is a condition for successful processing of a case study (partial performance measurement).

Issuing grades

Excellent	94
Very good	90–94
Good	75–89
Satisfactory	60–74
Pass	50–59
Fail	0–49

Retake and late completion

In accordance with the rules of the TVSZ.

Coursework required for the completion of the subject

participation in contact classes	48
homework preparation	24
independent acquisition of designated written curriculum	30
exam preparation	48
total	150

Approval and validity of subject requirements

III. COURSE CURRICULUM

THEMATIC UNITS AND FURTHER DETAILS

Topics covered during the term

The learning outcomes of 2.2 can be achieved by studying the following areas and topics

- 1 Characteristics of project phases, relationship between the project life cycle and the product life cycle.
- 2 Processes, process groups.
